PROCEEDS SUPPORT THE DEVILS RIVER CONSERVANCY 501(c)3

It's Not Easy to Save a River... TREASURE. PRESERVE. PROTECT.

Accomplishments

With your help, the DRC has made great progress over the past year, even with all that the world threw our way. As an organization, we survived the first year of the pandemic, grew stronger, and remained mission-focused to preserve and protect the Devils River.

- Our national award-winning campaign, ***Don't Blow It, Texas***, played a critical role in passing the **Lone Star Infrastructure Protection Act**. This new law impedes the Chinese developers in Val Verde County from building wind farms around the Devils River by prohibiting them from connecting to the Texas electrical grid.
- During the 2021 legislative session, we supported legislation to protect our few remaining pristine streams from wastewater discharge. While the bill did not pass, our advocacy work has elevated the importance of the issue. **We are laying the groundwork for success in the 2023 legislation session.**
- **We launched critical spring flow research in the headwaters** of the Devils River watershed to further understand the aquifer and springs.
- Recognizing the need to unite the Devils River research community and expand our understanding of the watershed, **we formed the Devils River Research Working Group**. The group brings state agencies and research organizations together to identify and address research gaps.
- We are supporting the first-ever gain-loss study of the Devils River. The year-long study will provide insight into river flow patterns and groundwater contributions.
- **We launched the successful Devils River Advocate membership program.** Are you a member yet?

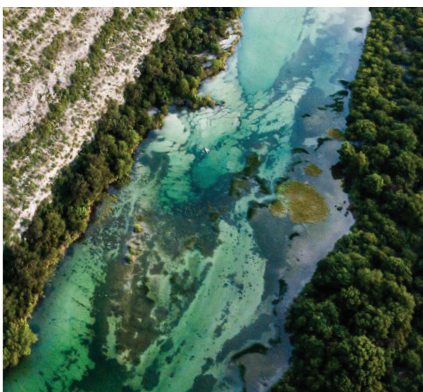

Board Of Directors

ALICE BALL STRUNK | JOHN SHEPPERD | ED MAYFIELD

ANDY IVERSON | JIM NORMAN | RUTH BOWMAN RUSSELL

CHASE RIVERA | RANDY NUNNS | RUSTY WALLACE
